ZONING COMPLIANCE PERMIT – Fence

A plot plan or survey must be submitted along with completed application and filing fee.

OFFICE USE ONLY

Permit Number: Date: Receipt:
Related Project(s): Expiration Date: (2 years from date of approval)

An approved Zoning Compliance Permit is required prior to construction of certain residential fences and walls. Section 5.4(g) states, fences and walls are permitted in any yard or along the edge of any yard and to such heights as follows, provided the vision necessary for safe vehicular and pedestrian movement on driveways and streets are not impeded:

- All Residential, OI, NC and CR Districts: Open and solid fences to four feet in front and corner side yards; solid fences to six feet in side and rear yards; open fences to any structurally-sound height in side and rear yards; solid rear and side yard fences to eight feet as a special exception if granted by the Board of Adjustment.
Service Business (SB) Districts: Solid fences to four feet in front yards; solid fences to ten feet in side and rear yards; open fences to any structurally-sound height in any yard.
Industrial Districts (I-1; I-2): Solid and open fences to any structurally-sound height.
Swimming Pools: Swimming pools shall be completely isolated from adjacent properties and from streets by a fence or wall having a minimum height of four feet, and a maximum height as provided above, constructed so as to prevent the passage of small children.

The Unified Development Ordinance (UDO) does not provided requirements for setbacks on fences; however, we do recommend that the fence be placed a minimum of six (6) inches inside the property line in an effort to avoid property line disputes.

Constructing a fence within an access or utility easement is not permitted. Constructing a fence within a drainage easement is permitted under certain conditions. Please note any easements on the property and their size and type. If a fence is approved within an easement, a signed easement waiver is required.

Fence Type: Fence Location: Fence Height:
Solid Front
Open Side
Rear

Examples of open fences include chain-link and split-rail fences. Solid fences are defined as privacy-type fences, and any kind of fence through which it is difficult to see. If you need help determining the type of fence you are installing, please ask a Planner be fore filling out your application.
